

# 68RFE Low Reverse Clutch Options

Available Products  
December 2017

## Standard

Part Number: 140421AM  
Standard Pack: 10

## Performance

Part Number: 141322AM  
Standard Pack: 10

BorgWarner is now offering a Performance Low Reverse clutch with higher torque capacity and improved durability. The Performance clutch offers 20% more torque capacity and improved durability at higher torque levels. The Performance clutch is a “Drop In” replacement for the Standard and original equipment versions. The performance increase is achieved with tight tolerances and changes to the inner race and sprags. Because the parts look identical, the outer race of the Performance clutch is black to easily identify. The table below shows the increase in engagements or cycles to failure at different torque levels.

Cycles to Failure										
Torque Level	80	85	90	95	100	105	110	115	120	125
Performance	35,000+	7,845	2,800	495	54	27	8	3	2	1
Standard	12,425	518	162	21	2	1	0	0	0	0

**Quality. Performance. Reliability.**
